

# Infrastructure in Nicaragua

Our Infrastructure (Housing) program seeks to create dignified housing solutions for families in 2 communities of Nicaragua. We have constructed a total of over 300 houses to date.

- The Infrastructure program consists of:
  - Subsidized housing (Family pays 30% and offers the labor of one family member; FNEI covers 70% of costs and facilitates design, supervision, laborers and movement of materials)
  - The construction includes:
    - A one-room brick house
    - A latrine
  - Families are eligible for affordable home improvement loans
