

Health in Peru

Lasting change is achieved through strong partnerships, which we have forged with local governments, and our incredible community partners, Asociación Latidos in the Lambayeque region, and Asociación Wiñaypaq, in Cusco.

We support them as they coordinate the efforts of governments and communities:

- Essential diagnostic testing, specialist consults, equipment (including PPE) and medication
- Medical brigades
- Special Education support
- Long-term accompaniment for local health posts
- Medical clinics with international medical volunteers coordinated with community partners
