

# Finca Girasol

Finca Girasol (translates to “Sunflower Farm”) in Chacraseca is an agroecological, biodiverse and sustainable farm using organic and biointensive practices. It is an educational farm that works to teach university students and the local community how to restore the soil, which has been severely damaged from the continued, heavy use of pesticides since the 1960s and work toward sustainability with alternative farming techniques.

- Finca Girasol consists of:
  - A 14-manzana farm (5.7 acre)
  - An organic vegetable garden
  - Internships for university students
  - Educational workshops for students and the community
- Our goals for 2024 are:
  - Expand our Seed Bank
  - Launch our pilot Nutrition program: Sow, Eat, Grow
  - Expand our added value product offerings
