# A little more about the FUCPE collaboration

The school, FUCPE, is an opportunity to partner with the community and improve conditions. The school, just four classrooms for over 300 students offers only half day classes where multiple grades share the same space and teacher. A majority of the students enrolled in FUCPE, of Haitian-Dominican ancestry, face systemic discrimination, and are unable to attend high school or college if they do not present an identification card.

FNE International is working with the community to continue providing educational opportunities and developing improved school buildings.
